

Poster Guidelines and Submission

The Health meets Food Research team is now accepting applications for Faculty, Resident and/or Student Posters for the Health meets Food Poster Session or Research Conference to be held as part of this year's Culinary Medicine Conference.

Links to the posters with their abstracts will be maintained on the CulinaryMedicine.org website. You can see examples of previous posters at this link:

<https://culinarymedicine.org/research-2/>

This is the opportunity to showcase how your team has utilized Culinary Medicine in teaching and patient intervention and for others to learn of the outcomes in your location. Show attendees the many ways in which culinary medicine has been taught, appreciated and used in your patient and student population. Student submissions are highly encouraged.

Poster submissions will be peer-reviewed for academic content and interest by the Health meets Food Research Committee. In addition to publication of your poster and abstract on the website and ability to present the work at the conference, we will evaluate all contributions for the best 2022 contribution.

Our judging methods will include evaluation of relevance of the study question, choice of methodology, soundness of results and conclusions, replicability, effectiveness of poster display and importance of the contribution of work accomplished with regard to advancing the field of culinary medicine in education. The winner of this evaluation process will receive free admission to the 2023 annual Health meets Food conference.

Please copy form, complete and submit in word format. Include a 150 word summary of this activity which will be posted on the Health meets Food website (if accepted) with your actual poster

Email your completed application to moodle@culinarymedicine.org.

Poster submissions will be peer-reviewed for academic content and interest.

Abstracts will be accepted until close of business April 15, 2022.

Accepted applicants will be notified by May 1, 2022

Poster Guidelines and Submission

Type of activity (pick one)

Original research _____ | Educational endeavor _____ | Clinical endeavor _____

Contact information for corresponding author and presenter.

Please note that based on evaluation of prior year submissions, we encourage formatting and editing to optimize readability of content. Posters that are created with excessive wording and smaller font sizes will not be as effective on display.

Name	
Title	
Institution	
Email Address	
Phone	

1. Title
2. Purpose (consider bulleted format)
3. Methods – outcome measures chosen , study setting, participants

4. Results (visual representation of data is preferred when able)

5. Conclusions

6. Support and references
